Publishing Open Access

TU Dortmund Resolution on Open Access

TU Dortmund endorses the call for Open Access to scientific knowledge on the internet by the following provisions and recommendations:

TU Dortmund supports its scholars in publishing their research in Open Access media.

TU Dortmund asks its scholars to make all their published articles publicly available on an academic repository, provided it is in their right to do so. TU Dortmund encourages its scholars not to grant publishers exclusive rights of use restricting their right to self-archiving.

TU Dortmund institutional repository Eldorado offers scholars a maximum degree of visibility, authenticity, integrity and persistent citability for their Open Access publications.

TU Dortmund University Library supports and advises researchers on all legal and practical matters of Open Access publishing.

TU Dortmund has established an Open Access fund managed by TU Dortmund University Library to encourage publications in Open Access media employing discipline-specific means of quality assessment.

The aim of this resolution is to ensure a maximum degree of visibility for TU Dortmund scholars' research output. TU Dortmund acknowledges that publishing habits and thus requirements vary between disciplines, that scholars' autonomy in exercising their rights must not be restricted and that discipline-specific forms of quality assurance are essential also with regard to Open Access publishing.

What is Open Access?

„What is open access? Open access means that scientific literature should be publicly available, free of charge on the Internet so that those who are interested can read, download, copy, distribute, print, search, refer to and, in any other conceivable legal way, use full texts without encountering any financial, legal or technical barriers other than those associated with Internet access itself.“

The two roads to Open Access

■ The „golden“ road to Open Access is to first publish new findings in an Open Access medium. Gold Open Access is popular especially in the life sciences and in medical science. Open Access media in these particular disciplines often charge so-called “article processing charges (APC)” or “author fees”.

■ Taking the „green“ road to Open Access, often called “self-archiving“, means to republish a document that was originally (or is going to be) published in a closed access medium on an institutional repository or on a private homepage. Green Open Access includes preprints and postprints.

Open Access – a forward-looking alternative to conventional business models in publishing.

Publishing Open Access at TU Dortmund

Funding can be applied for if you choose to publish Open Access. Your article needs to meet the following criteria:

- The article is published in a ‘genuine’ Open Access medium: the contents of the journal will be publicly available directly upon publication
- Applicants must provide evidence that they are submitting or corresponding author and as such are liable for publication fees.
- The journal must meet quality requirements, e.g. be listed in the Directory of Open Access Journals (DOAJ)
- Publication fees for an article must not exceed EUR 2.000,-

Your advantages as an author

- Publishing professionally – quick and free of charge
- World-wide visibility and maximum search-engine exposure
- Cataloguing according to international cataloguing standards
- Long-term digital preservation, accessibility and readability
- Publications become available more quickly
- Open Access accelerates scholarly communication, promotes networking
